

ZAG SIGNS ERP

User Manual — Complete Guide

This manual covers every module of the ZAG SIGNS ERP — from lead capture and quotations to work-order tickets, tax invoices, Tally sync and bulk data import.

MODULES INCLUDED:

- CRM (Leads & Opportunities) — Track every sales prospect from first contact to conversion
- Customers — Master records with full transaction history
- Quotations — Professional quotations with revisions and branch-wise numbering
- Work Order Tickets & Designer Workflow — Front-office to designer queue system
- Sales Orders & Production — Manage confirmed orders through production to delivery
- Invoices & Tally Integration — Generate tax invoices and sync to Tally with one click
- Inventory Management — Stock catalogue and movement tracking with low-stock alerts
- Collections & Finance — Record payments and track outstanding dues
- HR & Attendance — Employee profiles, daily attendance and leave management
- Field Visits & Team Reports — Log customer visits and file activity reports
- Reports & MIS — Daily, weekly and monthly reports, GST summaries and KPI dashboards
- Admin & User Management — User management, company settings and complete audit trail
- Batch Data Import & Export — Bulk-load data for Customers, Leads, Inventory and Employees

KEY FEATURES:

' Branch-wise numbering and data isolation

- ' Role-based access control (9 different roles)
- ' Real-time sync across all branches
- ' Mobile-friendly (Progressive Web App)
- ' Integrated with Tally XML export
- ' Professional PDF generation for quotations & invoices
- ' Complete audit trail for compliance
- ' Works on desktop, tablet, and mobile

GETTING STARTED:

1. Open <https://bprozagcrm.xyz> in any modern browser (Chrome, Firefox, Safari, Edge)
2. Login with your credentials (credentials provided by your IT Admin)
3. Navigate using the sidebar menu to access different modules
4. Use Ctrl+K (Windows) or Cmd+K (Mac) to open global search anytime
5. Click on the user icon (top-right) to access settings and user preferences

END-TO-END WORKFLOW

The complete business workflow in ZAG SIGNS ERP follows this chain:

**LEAD !' OPPORTUNITY !' CUSTOMER !' QUOTATION !' WORK ORDER !' S
INVOICE !' TALLY**

Each step is connected. Action buttons on every row let you move forward without re-entering data:

- On a Lead row: [Opp] creates Opportunity | [Customer] creates Customer | [Quote] creates Quotation
- On an Opportunity row: [Customer] creates Customer | [Quote] creates Quotation
- On a Customer row: [Quote] creates Quotation
- On an approved Quotation: [Ticket] raises Work Order Ticket | [Invoice] creates Tax Invoice
- On an Invoice: [Tally XML] downloads Tally import file | [Mark Paid] updates payment status
