13. HR & Attendance
14. Field Visits & Team Reports
15. Admin & Settings
16. Batch Data Import & Export
17. Role Permission Matrix
18. FAQ
19. Keyboard Shortcuts

1. Introduction & System Overview

ZAG SIGNS ERP is a cloud-based Enterprise Resource Planning system built exclusively for ZAG SIGNS and its branches. It manages the complete business lifecycle — from capturing a sales lead to issuing a Tax Invoice and syncing with Tally — in one integrated platform.

Key Features

- ' Branch-wise operations with independent numbering sequences
- ' Role-based access control (9 different user roles)
- ' Real-time data sync across all branches
- ' Mobile-friendly Progressive Web App (PWA)
- ' Integrated with Tally XML import/export
- ' Professional PDF generation for quotations and invoices
- ' Complete audit trail for compliance
- ' Works on desktop, tablet, and mobile devices
- ' Global search using Ctrl+K / Cmd+K
- ' Batch data import for bulk operations

2. Getting Started

To access ZAG SIGNS ERP:

1. Open <https://bprozagcrm.xyz> in any modern browser
2. Enter your email and password (provided by IT Admin)
3. Click "Login" — you will see the main dashboard
4. Navigate using the sidebar menu on the left
5. Use the sidebar toggle (&0) icon on mobile to show/hide menu

Navigation Tips

- Use Ctrl+K (Windows) or Cmd+K (Mac) to open global search anytime
- Click on your user avatar (top-right) to access Settings
- The sidebar shows your role and assigned branch
- Each module has its own section in the sidebar

3. End-to-End Business Workflow

The complete business flow in ZAG SIGNS ERP follows this chain:

LEAD !' OPPORTUNITY !' CUSTOMER !' QUOTATION !' TICKET !' SALES C

Each step is connected through action buttons. When you need to move forward (e.g., convert a Lead to Customer), you can do so without re-entering data.

- Lead Row: [Opp]!' create Opportunity | [Customer]!' create Customer directly
- Opportunity Row: [Customer]!' create Customer | [Quote]!' create Quotation
- Customer Row: [Quote]!' create Quotation from customer details
- Quotation (approved): [Ticket]!' create Work Order Ticket | [Invoice]!' create Invoice
- Invoice Row: [Tally XML]!' download Tally import file | [Mark Paid]!' record payment

4. Leads & CRM Module

The Leads & CRM module is where your sales pipeline begins. Every potential customer starts here.

Key Features

- Status tracking: NEW !' PROSPECTING !' QUALIFIED !' QUOTED !' WON / LOST
- Lead Source: mark each lead source (Direct, Referral, Social Media, etc.)
- Follow-up dates: system highlights today's follow-ups at the top
- Branch-wise leads: each branch sees only its own leads
- Notes field: store conversation history and important details
- Bulk import: import 1000+ leads from Excel

Workflow

Step 1: Create a new Lead (or bulk import from Excel)

Step 2: Follow up via phone/email — add notes and update Follow-up Date

Step 3: When customer is interested, click [Opp] to create Opportunity

Step 4: From Opportunity, click [Customer] to create Customer record

Step 5: From Customer, click [Quote] to create Quotation

Step 6: Once approved, create Work Order Ticket or Invoice

5. Other Modules Overview

Opportunities

Track qualified prospects with interest in your product/service. Manage deal values, probabilities, and closing dates.

Customers

Master database of all customers with complete transaction history, shipping addresses, and contact information.

Quotations

Generate professional quotations with GST calculations. Version control and branch-wise numbering.

Sales Orders

Confirmed orders from customers, linking quotations to production and delivery.

Invoices

Generate tax invoices with line-item details. Export as Tally XML for seamless accounting sync.

Work Orders

Production tasks, design approvals, and delivery management.

Collections

Track payments, record partials, manage overdue invoices.

HR & Attendance

Employee profiles, daily attendance, leave management.

Reports & MIS

Daily, weekly, monthly reports, GST summaries, KPI dashboards.

Tips & Shortcuts

- Ctrl+K / Cmd+K: Open global search anytime
- Click any row's ID number to open the detail view
- Most modules support Excel bulk export (click "Excel" button)
- Use date range filters before exporting to narrow results
- Tally XML exports fail silently if ledgers don't exist in Tally
- Session expires after 24 hours — you'll be redirected to login
- Download this manual as PDF: click "Download" at the top
