1. Introduction & System Overview

ZAG SIGNS ERP is a cloud-based Enterprise Resource Planning system built exclusively for ZAG SIGNS and its branches. It manages the complete business lifecycle — from capturing a sales lead to issuing a Tax Invoice and syncing with Tally — in one integrated platform.

The system is accessible at bprozagcrm.xyz from any browser (desktop, mobile, tablet). No installation is required. All data is stored securely on cloud servers with automatic daily backups.

Key Features

- Branch-wise operations with independent numbering sequences for each branch
- Role-based access control with 9 different user roles (MD, AVP, Business Manager, Sales Executive, CRES, Production, Designer, Accounts, HR)
- Real-time data sync across all branches instantly
- Mobile-friendly Progressive Web App (PWA) — works on desktop, tablet, and mobile
- Integrated with Tally XML export — export tax invoices in one click
- Professional PDF generation for quotations and invoices with company logo
- Complete audit trail for compliance and dispute resolution
- Cloud-based with automatic backups and 99.9% uptime SLA

2. Getting Started — Login & Navigation

Login and navigate the system in a few simple steps.

Step-by-Step Guide

Step 1: Open the Application

Open any modern browser (Chrome, Firefox, Safari, Edge) and go to bprozagcrm.xyz. Recommended: Google Chrome (latest version). The system works on all major browsers and mobile devices.

Step 2: Sign In

Enter your registered email address and password. New users receive login credentials via email after their account is approved by the IT Admin.

Step 3: Dashboard

After login you land on the Dashboard. It shows live KPIs: Total Revenue (YTD), Active Orders, Open Leads, Pending Collections, Open Complaints and Team Tasks.

Step 4: Sidebar Navigation

On desktop: click any module in the left sidebar. The sidebar is organized into sections: OVERVIEW, SALES, OPERATIONS, FINANCE, PEOPLE & FIELD, REPORTS, ADMIN. On mobile: tap menu.

Step 5: Global Search

Press Ctrl+K (Windows) or Cmd+K (Mac) at any time to open the global search. Type any name, number, or keyword to search across all modules.

Step 6: Install on Mobile (PWA)

Android: Chrome !' "î menu !' "Add to Home Screen". iPhone: Safari !' Share but app opens full-screen like a native app.

3. End-to-End Business Workflow

The complete business flow follows this chain:

LEAD !' OPPORTUNITY !' CUSTOMER !' QUOTATION !' WORK ORDER !' S
TALLY

Each step is connected through action buttons. Key connections:

- Lead row: [Opp] creates Opportunity | [Customer] creates Customer | [Quote] creates Quotation
- Opportunity row: [Customer] creates Customer | [Quote] creates Quotation
- Customer row: [Quote] creates Quotation
- Approved Quotation: [Ticket] raises Work Order | [Invoice] creates Tax Invoice
- Invoice row: [Tally XML] downloads Tally export | [Mark Paid] records payment status

This design ensures zero data re-entry from lead capture to final accounting, saving time and reducing errors.

4. Leads & CRM Module

Track every sales prospect from first contact to conversion.

Key Features

- Status tracking: NEW !' CONTACTED !' QUALIFIED !' PROPOSAL !' NEGOTIATED !' WON !' LOST !'
- Lead Source tracking: Direct, Referral, Social Media, Trade Show, Website, Phone
- Follow-up dates: system highlights today's follow-ups at the top
- Branch-wise leads: each branch sees only its own leads
- Notes field: store conversation history and important details
- Bulk import: import 1000+ leads from Excel in one go
- Export to Excel: download filtered list for external analysis

Quick Steps

- Create a new lead via the "New Lead" button or bulk import from Excel
- Update status and follow-up date after every customer interaction
- Click [Opp] to convert to Opportunity when customer shows interest
- Click [Customer] to create permanent Customer record when deal is won
- Click [Quote] to create quotation linked to this lead

5. Opportunities Module

Track deal probability and pipeline value with visual funnel stages.

Key Features

- Pipeline funnel visualization at the top with deal counts and total value
- Stages with probability: Qualification (20%) !' Proposal (40%) !' Negotiation (100%)
- Clickable stage buttons to filter deals by stage
- Probability auto-updates when you change stage
- Convert to Customer or Quotation using action buttons
- Lost deals hidden by default — click "Lost" filter to review

Quick Steps

- View the funnel at the top showing opportunities by stage and value
- Click any stage button to filter the table
- Update stage dropdown on any row to move deal forward
- Use [Customer] and [Quote] buttons to proceed in workflow

6. Customers Module

Customer master records with full transaction history and outstanding balance tracking.

Key Features

- Add customer with required fields: Name, Company, Phone, Branch
- Auto-generated Customer ID as C001, C002, etc.
- Bulk import existing customer base from Excel in one upload
- View complete transaction history: quotations, orders, invoices, complaints, collections
- Outstanding balance auto-updates as invoices and payments are recorded
- GST No field for tax compliance
- Credit limit and payment terms per customer

Quick Steps

- Click "Add Customer" and enter required details
- Bulk import from Excel using the "Import" button
- Click any customer row to view full transaction history
- Click [Quote] button to create quotation for this customer

7. Quotations Module

Create, send, revise and convert professional quotations with full GST support.

Key Features

- Professional quotation PDF with company logo, letterhead, GSTIN
- Auto-numbered as ZAG/Q/BRANCH/001 (branch-wise sequencing)
- Line items with Description, Qty, Unit (Nos/Sqft/Rft/Mtr/Job/Set), Rate
- GST calculation: enter GST %, system splits as CGST and SGST
 - Status workflow: DRAFT !' SENT !' SUBMITTED !' APPROVED !' REJECTED
- Revision history: create revisions as ZAG/Q/HO/007-R2 with change notes
- Convert to Work Order Ticket or Tax Invoice with one click
- Valid Until date for automatic expiration

Quick Steps

- Click "New Quotation" and select Customer
- Add line items: Description, Qty, Unit, Rate per unit
- Set GST % at bottom — system auto-calculates CGST and SGST
- Click "PDF" to preview and save as PDF
- Update status as quotation progresses through workflow
- Click [Ticket] or [Invoice] to create Work Order or Tax Invoice
