1. Introduction & System Overview

ZAG SIGNS ERP is a cloud-based Enterprise Resource Planning system built exclusively for ZAG SIGNS and its branches. It manages the complete business lifecycle — from capturing a sales lead to issuing a Tax Invoice and syncing with Tally — in one integrated platform. The system is built with modern web technologies and provides seamless integration across all departments and branches.

The system is accessible at bprozagcrm.xyz from any modern browser (Chrome, Firefox, Safari, Edge) on desktop, laptop, tablet, or mobile phone. No installation is required. All data is stored securely on cloud servers with automatic daily backups and industry-leading 99.9% uptime SLA. The application is also available as a Progressive Web App (PWA) for installation on mobile devices.

Key Highlights

- Fully cloud-based with no local installation required
- Accessible from any device with internet and browser
- Progressive Web App (PWA) support for mobile installation
- Real-time data sync across all branches
- Automatic daily backups with 99.9% uptime SLA
- Mobile-friendly responsive design
- Works offline with sync when connection restored

Core Modules

- CRM (Leads & Opportunities) — prospect management
- Customers — master customer database
- Quotations & Proposals — professional quotations with GST
- Work Order Tickets — front-office to designer workflow
- Sales Orders & Production — order to delivery tracking
- Invoices & Tax Compliance — tax invoices with Tally sync
- Inventory Management — stock tracking and management
- Collections & Finance — payment tracking and reconciliation
- HR & Attendance — employee and attendance management
- Field Visits & Team Reports — daily/weekly/monthly reports
- Batch Import/Export — bulk data operations
- Admin & User Management — system configuration

2. Getting Started — Login & Navigation

Login to the system and explore the dashboard and navigation. This section walks you through the first steps after you receive your login credentials from the IT Admin.

Quick Start

- Open any modern web browser (Chrome recommended)
- Navigate to <https://bprozagcrm.xyz>
- Enter your email address and password
- Click "Login" button
- You will land on your Dashboard

Understanding the Dashboard

The Dashboard shows live KPIs and metrics:

- Total Revenue (Year-to-Date) — YTD sales
- Active Orders — ongoing sales orders
- Open Leads — new sales prospects
- Pending Collections — outstanding payments due
- Open Complaints — unresolved customer issues
- Team Tasks — pending tasks assigned to you

Navigation Structure

The sidebar on the left organizes all modules into sections:

- OVERVIEW — Dashboard and Reports
- SALES — Leads, Opportunities, Quotations, Customers
- OPERATIONS — Work Orders, Sales Orders, Production
- FINANCE — Invoices, Collections, Payments
- PEOPLE & FIELD — HR, Attendance, Field Visits, Reports
- REPORTS — MIS, Analytics, Exports
- ADMIN — Users, Settings, Audit Trail

Mobile Navigation

On mobile devices, tap the hamburger icon (top-left) to open the sidebar menu. The menu will slide in from the left.

3. End-to-End Business Workflow

Understanding how data flows through the system is critical. Every module is connected to the next, ensuring zero data re-entry and complete data consistency.

Complete Business Flow:

LEAD !' OPPORTUNITY !' CUSTOMER !' QUOTATION !' WORK ORDER TICKET !' SALE

Each step is connected through one-click action buttons that auto-populate data from the previous stage:

Stage-by-Stage Connections

- On a LEAD row: [Opp] creates new Opportunity | [Customer] creates Customer | [Quote] creates Quotation
- On an OPPORTUNITY row: [Customer] creates Customer | [Quote] creates Quotation with opportunity details
- On a CUSTOMER row: [Quote] creates Quotation with customer pre-selected
- On an approved QUOTATION: [Ticket] creates Work Order Ticket | [Invoice] creates Tax Invoice (items auto-copied)
- On an INVOICE row: [Tally XML] downloads Tally import file | [Mark Paid] updates payment status to PAID

This workflow design eliminates data re-entry, ensures consistency, and reduces errors significantly.

4. Leads & CRM Module

Leads & CRM is the entry point for all new sales opportunities. Track every prospect from first contact through to becoming a customer.

Key Features & Details

- Prospect Status tracking through complete pipeline
- Lead Source tracking: Direct, Referral, Social Media, Trade Show, Website, LinkedIn, Phone, Other
- Follow-up Date scheduling with system highlighting today's follow-ups at the top
- Branch-wise Lead isolation — each branch sees only its own leads
- Notes and Communication History in the Notes field
- Contact Person and Company details
- Estimated Value and potential deal size
- Bulk Import/Export with Excel templates
- Filter by Status, Source, Branch, Follow-up Date
- Search leads by Name, Phone, Company, Email

Step-by-Step Workflow

- Create a new Lead: Click "New Lead" button or use bulk import to add multiple leads
- Enter Details: Name (required), Phone (required), Branch (required), Company, Email, Source, Est. Value, Follow-up Date
- Update Status: As you interact with the prospect, update their status (NEW !' CONTACT !' NEGOTIATION !' WON)
- Set Follow-up: Always set a Follow-up Date for the next action
- Convert to Opportunity: When the prospect shows interest, click [Opp] to convert to Opportunity
- Convert to Customer: When deal is won, click [Customer] to create permanent Customer record
- Create Quotation: Click [Quote] to create a professional quotation directly from the Lead

5. Opportunities Module

Opportunities track deals in progress with visual pipeline funnel showing conversion probability and deal value.

Key Features & Details

- Pipeline Funnel Visualization at the top showing opportunities by stage
- Deal count and total value for each stage
- Probability auto-updating with stage changes
 - Stages with Probabilities: Qualification (20%) !' Proposal Sent (40%) !' Negotiation (60%) !' Won (100%)
- Clickable stage buttons to filter opportunities
- Expected Close Date tracking
- Deal value and probability calculations
- Linked to Lead and Customer records
- Quick actions: [Customer] [Quote] [Edit] [Delete]

Step-by-Step Workflow

- View Pipeline: See funnel at top with deal counts and values per stage
- Filter by Stage: Click stage buttons to filter opportunities
- Update Stage: Use dropdown to move opportunities forward
- Convert to Customer: Click [Customer] to create customer when deal is qualified
- Create Quotation: Click [Quote] to generate quotation with opportunity details
- Track Progress: Monitor deals through various stages to close

6. Customers Module

Customers module maintains master records of all customers with complete transaction history and outstanding balance tracking.

Key Features & Details

- Auto-generated Customer IDs: C001, C002, etc. (unique per branch)
- Required Fields: Name, Company, Phone, Branch
- Optional Fields: Email, GST No, Billing Address, Shipping Address, Credit Limit
- Contact Person and designation
- Complete Transaction History: Quotations, Orders, Invoices, Complaints, Collections
- Outstanding Balance auto-updating
- Payment Terms and Credit Limit tracking
- Bulk Import/Export of customer database
- Search by Name, Company, Phone, GST No, Email
- Filter by Branch, Status, Outstanding Balance

Step-by-Step Workflow

- Add Customer: Click "Add Customer" and enter required details
- Bulk Import: Use Import to load existing customer database from Excel
- View History: Click any customer to see complete transaction history
- Create Quotation: Click [Quote] to create quotation for this customer
- Track Outstanding: System auto-tracks outstanding balance across all invoices
- Record Payments: Payments recorded in Collections update outstanding balance

7. Quotations Module

Professional quotations with GST support, revision history, and one-click conversion to invoices and work orders.

Key Features & Details

- Auto-numbered Quotations: ZAG/Q/BRANCH/001 (branch-wise sequencing, never resets)
- Professional PDF with Company Logo, Letterhead, GSTIN
- Line Items: Description, Quantity, Unit (Nos/Sqft/Rft/Mtr/Job/Set/Box), Rate per Unit
- GST Calculation: Enter GST % and system auto-calculates CGST and SGST
- Discount: Apply discount at line or total level
 - Status Workflow: DRAFT !' SENT !' SUBMITTED !' APPROVED !' REJECTED
- Revision History: Create revisions as R1, R2 with change notes
- Valid Until Date: Auto-expires quotation
- Quick Actions: [PDF] [Revise] [Ticket] [Invoice]
- Email: Send quotation via email directly from system

Step-by-Step Workflow

- Create Quotation: Click "New Quotation" and select Customer
- Add Line Items: Enter Description, Qty, Unit, Rate per unit
- Set GST: Enter GST % and system auto-splits as CGST/SGST
- Apply Discount: Optional discount at line or total level
- Preview PDF: Click "PDF" to preview before sending
- Update Status: Change status as quotation progresses (SENT, SUBMITTED, APPROVED)
- Create Revision: Use "Revise" for modifications (creates new quote with -R1, -R2, etc.)
- Convert to Ticket: Click [Ticket] when approved to create Work Order Ticket
- Convert to Invoice: Click [Invoice] to create Tax Invoice with items auto-copied

8. Invoices & Tally Integration

Features

- Auto-numbered Tax Invoices: ZAG/INV/BRANCH/001
- CGST/SGST calculation with HSN/SAC codes
- Line Items auto-populated from quotations
- Invoice Status: DRAFT !' SUBMITTED !' PAID/PARTIAL/OVERDUE
- Tally XML export for seamless Tally integration
- Bank Details on invoice for payment instructions
- Invoice Date and Due Date tracking
- Collection status tracking

Workflow Steps

- Create Invoice from quotation: Click [Invoice] button on approved quotation
- Verify Details: Confirm customer, items, GST, totals
- Preview PDF: Click "PDF" to preview professional invoice
- Save/Print: Save as PDF or print directly
- Export to Tally: Click [Tally XML] to download Tally import file
- Import in Tally: In TallyPrime go to Gateway !' Import Data !' Vouchers !' select XML fi
- Record Payment: Click [Mark Paid] when payment received
- Track Collection: Outstanding balance auto-updates after payment

9. Work Order Tickets & Designer Workflow

Features

- Work Ticket ID: ZAG/TKT/BRANCH/001 (auto-numbered)
- Designer Assignment and Queue Management
 - Status Tracking: NEW !' ASSIGNED !' IN PROGRESS !' COMPLETED
- Printable Work Slip for production floor
- Item Details with Quantity and Specifications
- Delivery Date and Address
- Designer Notes and Instructions
- Completion Date and Handover Tracking

Workflow Steps

- Create Ticket from quotation: Click [Ticket] on approved quotation
- Assign Designer: Assign work to specific designer from dropdown
- Designer Notification: Designer gets task in their queue
- Update Status: Change status as work progresses
- Print Work Slip: Click [Print] to print work instructions for floor
- Track Progress: Monitor work through various stages
- Mark Complete: Designer marks complete when ready for delivery

10. Sales Orders

Features

- Sales Order ID: ZAG/SO/BRANCH/001
- Auto-created from approved quotations
- Line items with quantities and rates
 - Order Status: DRAFT !' CONFIRMED !' PARTIAL !' FULFILLED
- Delivery Address and Date
- Order Value tracking
- Linked to Production and Invoicing

Workflow Steps

- Sales Order auto-created from quotation approval
- Confirm Order: Mark as CONFIRMED when customer confirms
- Update Delivery: Set delivery date and address
- Track Items: Monitor item fulfillment
- Raise Work Order: Link to production for manufacturing
- Mark Fulfilled: When all items delivered, mark as FULFILLED

11. Work Orders & Production

Track production from assignment to completion.

Key Functions

- Create from sales orders
- Assign production team
- Status tracking
- Quality checks
- Delivery scheduling

12. Finance — Collections & Payments

Record and track customer payments.

Key Functions

- Record payments against invoices
- Track overdue invoices
- Customer outstanding balance
- Payment reconciliation

13. HR & Attendance

Employee management and attendance tracking.

Features

- Employee profiles
- Daily attendance
- Leave requests
- Leave approvals
- Attendance reports

14. Field Visits & Team Reports

Log customer visits and generate reports.

Reports

- Daily Activity Reports (DAR)
- Weekly Work Reports (WWR)
- Monthly MIS Reports (MWR)
- Expense tracking
- Visit photos

15. Admin & Settings

System administration and configuration.

Admin Tasks

- User management
- Company settings
- Branch configuration
- Numbering setup
- Backup & restore

16. Batch Data Import & Export

Bulk-load data into the system.

Supported Imports

- Customers
- Leads
- Employees
- Inventory items
- Export current data as Excel

17. Role Permission Matrix

Module access by user role:

- MD — Full access to all modules
- AVP — Dashboard, Reports, Admin modules
- Business Manager — SALES, OPERATIONS, FINANCE
- Sales Executive — Leads, Opportunities, Quotations
- CRES — Customers, Collections, Field Visits
- Production — Work Orders, Production, Inventory
- Designer — Work Tickets, Quotations (read-only)
- Accounts — Invoices, Collections, Reports
- HR — HR, Attendance, Employees

18. Frequently Asked Questions

Q1: How do I reset my password?

Contact your IT Admin with your email ID. They will send a password reset link via email.

Q2: Can I access from mobile?

Yes, use any browser. Install as PWA: Android (Chrome ! "î !' Add to Home Screen) or iPh

Q3: How do I export lists to Excel?

Click "Excel" button on any list to export the filtered view as an Excel file.

Q4: How do I create quotation PDF?

In Quotations, click "PDF" on the row. Preview opens. Click Print and Save as PDF.

Q5: How do I export to Tally?

In Invoices, click [Tally XML]. Download the XML file. In Tally: Gateway !' Import Data !'

Q6: What if my session expires?

Sessions last 24 hours. If expired, simply sign in again.

Q7: Can multiple users work simultaneously?

Yes, the system supports unlimited concurrent users across all branches with real-time sync.

Q8: How do I add a new user?

Go to Admin !' User Management !' Add User. Enter email, assign role, and send the invit

Q9: How do I bulk import customers?

Go to Customers !' Click "Import". Download template, fill with your data, upload file, sy

Q10: How do I track outstanding payments?

In Customers, the Outstanding Balance column shows dues. Go to Collections to record payments and update status.

19. Keyboard Shortcuts & Tips

Keyboard Shortcuts

- Ctrl+K / Cmd+K — Open global search (search across all modules)
- Escape — Close any modal, dialog, or search overlay
- Ctrl+P / Cmd+P — Print current page (use in Quotations/Invoices for PDF)
- Ctrl+Shift+R / Cmd+Shift+R — Hard refresh (reload latest data from server)
- Tab — Move between form fields
- Enter — Submit form or confirm action

Best Practices & Tips

- Always update Lead status and Follow-up Date after every customer interaction
- Create Invoices from Quotations (using [Invoice] button), not manually, for data consistency
- Raise Work Order Tickets immediately after customer confirms the order
- Export to Tally XML on the same day as creating invoices for clean day-book entries
- Always download fresh import templates before bulk importing — keep headers unchanged
- Record Payments (Mark Paid/Partial) immediately when payment is received to keep collections current
- Never share your login credentials with anyone — contact IT Admin for account issues
- Install the app on your mobile (Add to Home Screen) for on-the-go field access during visits
- Use Global Search (Ctrl+K) to quickly find customers, leads, invoices, or quotations
- Filter data before exporting to Excel to reduce file size and get relevant data only
